

CHECKLIST ENVIRONMENTAL ASSESSMENT

Project Name:	Hughes Fence – Petroleum County
Proposed Implementation Date:	June 1, 2012
Proponent:	John (Jack) J Hughes
Location:	Section 36, Township 13N, Range 25E
County:	Petroleum County
Trust:	Common Schools

I. TYPE AND PURPOSE OF ACTION

The proponent is proposing to build approximately 2.75 miles of new fence on the north, east and west sides of this state tract.

II. PROJECT DEVELOPMENT

1. PUBLIC INVOLVEMENT, AGENCIES, GROUPS OR INDIVIDUALS CONTACTED:

Provide a brief chronology of the scoping and ongoing involvement for this project.

The Montana Department of Resources and Conservation/ Trust Lands Management Division (DNRC/TLMD) – Northeastern Land Office (NELO), and John (Jack) J Hughes – lessee of Lease #2427 are all involved in the proposed project.

2. OTHER GOVERNMENTAL AGENCIES WITH JURISDICTION, LIST OF PERMITS NEEDED:

No other governmental agencies have jurisdiction over this proposal.

3. ALTERNATIVES CONSIDERED:

Alternative A (No Action) – Under this alternative, the DNRC does not allow construction of the new fence.

Alternative B (Proposed Action) – Under this alternative, the DNRC does allow construction of the new fence.

III. IMPACTS ON THE PHYSICAL ENVIRONMENT

- *RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.*
- *Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.*
- *Enter "NONE" If no impacts are identified or the resource is not present.*

4. GEOLOGY AND SOIL QUALITY, STABILITY AND MOISTURE:

Consider the presence of fragile, compactable or unstable soils. Identify unusual geologic features. Specify any special reclamation considerations. Identify any cumulative impacts to soils.

The soils in the proposed project area are clays, shallow clays, and dense clays. There are no unusual geologic features in the proposed project area.

No cumulative effects to the soils are anticipated.

5. WATER QUALITY, QUANTITY AND DISTRIBUTION:

Identify important surface or groundwater resources. Consider the potential for violation of ambient water quality standards, drinking water maximum contaminant levels, or degradation of water quality. Identify cumulative effects to water resources.

There are no surface water resources in the proposed project area.

No important groundwater resources are expected to be impacted.

No cumulative effects to the water resources are anticipated.

6. AIR QUALITY:

What pollutants or particulate would be produced? Identify air quality regulations or zones (e.g. Class I air shed) the project would influence. Identify cumulative effects to air quality.

No cumulative effects to air quality are anticipated.

7. VEGETATION COVER, QUANTITY AND QUALITY:

What changes would the action cause to vegetative communities? Consider rare plants or cover types that would be affected. Identify cumulative effects to vegetation.

No rare plants or cover types are present.

No cumulative effects to vegetation are anticipated.

8. TERRESTRIAL, AVIAN AND AQUATIC LIFE AND HABITATS:

Consider substantial habitat values and use of the area by wildlife, birds or fish. Identify cumulative effects to fish and wildlife.

The proposed fence is designed according to the USDA, Natural Resource Conservation Service Guide to reduce collisions by sage grouse and to enhance wildlife movement under the bottom wire.

No cumulative effects to birds and wildlife are anticipated.

9. UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES:

Consider any federally listed threatened or endangered species or habitat identified in the project area. Determine effects to wetlands. Consider Sensitive Species or Species of special concern. Identify cumulative effects to these species and their habitat.

At this time, no known unique, endangered, fragile or limited environmental resources have been identified within the proposed project area.

A search of the Natural Heritage Program identified 11 Species of Concern: Long-billed Curlew (*Numenius americanus*), Brewer's Sparrow (*Spizella breweri*), Greater Sage-Grouse (*Centrocercus urophasianus*), Black-tailed Prairie Dog (*Cynomys ludovicianus*) Hoary Bat (*Lasiurus cinereus*) Burrowing Owl (*Athene cunicularia*), Chestnut-collared Longspurs (*Calcarius ornatus*), Sage Thrasher (*Oreoscoptes montanus*), McCowan's Longspur (*Calcarius ornatus*), Loggerhead Shrike (*Lanius ludovicianus*), and a fish, Northern Redbelly Dace (*Phoxinus eos*) that may occur in the area of the proposed fence project.

The proposed project will be of short duration. These species, if present, are expected to return to normal (pre-disturbance) within a short amount of time.

A review of the ArcGis data base shows a sage grouse lek is approximately 1/4 mile south of the proposed fenceline. Lek ID 224 was last surveyed in 2010. In 2009, and 2010, no sage grouse were observed on this lek. A field survey in May, 2012 determined that this lek is inactive at this time.

The fence will be built according to the USDA, Natural Resource Conservation Service Guide to reduce collisions by sage grouse and to enhance wildlife movement under the bottom wire.

No cumulative effects to habitat are anticipated.

10. HISTORICAL AND ARCHAEOLOGICAL SITES:

Identify and determine effects to historical, archaeological or paleontological resources.

A field survey was conducted on August 2, 2011. No archeological or paleontological resources were found on the proposed project area. There is an old (historic) canal or ditch in the SW corner of the tract. The ditch will not be impacted by the proposed project.

11. AESTHETICS:

Determine if the project is located on a prominent topographic feature, or may be visible from populated or scenic areas. What level of noise, light or visual change would be produced? Identify cumulative effects to aesthetics.

The state land does not provide any unique scenic qualities not also provided on adjacent private and public lands.

12. DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AIR OR ENERGY:

Determine the amount of limited resources the project would require. Identify other activities nearby that the project would affect. Identify cumulative effects to environmental resources.

No demands on limited resources are required for this project.

No direct or cumulative effects to environmental resources are anticipated.

13. OTHER ENVIRONMENTAL DOCUMENTS PERTINENT TO THE AREA:

List other studies, plans or projects on this tract. Determine cumulative impacts likely to occur as a result of current private, state or federal actions in the analysis area, and from future proposed state actions in the analysis area that are under MEPA review (scoped) or permitting review by any state agency.

There are no other projects or plans being considered on the tract listed on this EA.

IV. IMPACTS ON THE HUMAN POPULATION
<ul style="list-style-type: none">• <i>RESOURCES potentially impacted are listed on the form, followed by common issues that would be considered.</i>• <i>Explain POTENTIAL IMPACTS AND MITIGATIONS following each resource heading.</i>• <i>Enter "NONE" if no impacts are identified or the resource is not present.</i>

14. HUMAN HEALTH AND SAFETY:

Identify any health and safety risks posed by the project.

There are some human safety risks associated with the operation of heavy equipment. The proponent, the contractor, and their employees accept these risks.

15. INDUSTRIAL, COMMERCIAL AND AGRICULTURE ACTIVITIES AND PRODUCTION:

Identify how the project would add to or alter these activities.

No cumulative impacts to industrial, commercial, and agricultural activities are anticipated.

16. QUANTITY AND DISTRIBUTION OF EMPLOYMENT:

Estimate the number of jobs the project would create, move or eliminate. Identify cumulative effects to the employment market.

The proposed activity will require a limited number of workers. These positions are already held by employees of the proponent and the contractor. No new jobs will be created.

No cumulative effects to the employment market are anticipated.

17. LOCAL AND STATE TAX BASE AND TAX REVENUES:

Estimate tax revenue the project would create or eliminate. Identify cumulative effects to taxes and revenue.

There are no direct or cumulative effects to taxes or revenue for the proposed project.

18. DEMAND FOR GOVERNMENT SERVICES:

Estimate increases in traffic and changes to traffic patterns. What changes would be needed to fire protection, police, schools, etc.? Identify cumulative effects of this and other projects on government services

There will be no increases in traffic, no changes in traffic patterns, and no need for additional fire protection, or police services.

There will be no direct or cumulative effects on government services.

19. LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS:

List State, County, City, USFS, BLM, Tribal, and other zoning or management plans, and identify how they would affect this project.

There are no zoning or other agency management plans affecting these lands.

20. ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES:

Identify any wilderness or recreational areas nearby or access routes through this tract. Determine the effects of the project on recreational potential within the tract. Identify cumulative effects to recreational and wilderness activities.

No impacts to the recreational value are anticipated.

There will be no direct or cumulative effects on recreation or wilderness activities.

21. DENSITY AND DISTRIBUTION OF POPULATION AND HOUSING:

Estimate population changes and additional housing the project would require. Identify cumulative effects to population and housing

The proposal does not include any changes to housing or developments.

No direct or cumulative effects to population or housing are anticipated.

22. SOCIAL STRUCTURES AND MORES:

Identify potential disruption of native or traditional lifestyles or communities.

There are no native, unique or traditional lifestyles or communities in the vicinity that would be impacted by the proposal.

23. CULTURAL UNIQUENESS AND DIVERSITY:

How would the action affect any unique quality of the area?

The proposed project will have no effect on any unique quality of the area.

24. OTHER APPROPRIATE SOCIAL AND ECONOMIC CIRCUMSTANCES:

Estimate the return to the trust. Include appropriate economic analysis. Identify potential future uses for the analysis area other than existing management. Identify cumulative economic and social effects likely to occur as a result of the proposed action.

The proposed project is necessary to separate 2 different lessees on Bureau of Land Management (BLM) allotments. There will be no revenue returned to the trust.

V. FINDING

25. ALTERNATIVE SELECTED:

I have selected Alternative B (Proposed Action), and recommend that the DNRC does allow construction of the new fence.

26. SIGNIFICANCE OF POTENTIAL IMPACTS:

I have evaluated the potential environment effects and have determined that no negative long-term environmental impacts will result from the proposed activity.

27. NEED FOR FURTHER ENVIRONMENTAL ANALYSIS:

☐ EIS ☐ More Detailed EA ☒ **XXX** No Further Analysis
